Dear Fred,

Enclosed you will find a small portion of my picture album. Note that Ford Wixom's permit has been protected by Cef. Martin, Rudy Golla, John Lee, and Ron Gamble. All have made liscence application and are part of a loose conspiracy to defraud the government.

Picture #1 shows a bypass to the City of Wixom's sanitary line from the oxidation pond. This maneuver cleverly avoided reporting flow and BOD₅ on the M.O.R. and violates the N.P.D.E.S. permit. Such orders originated from P.E.O. under the direction of Mr. Frank Kalan.

Picture #2 shows E-coat material being dumped on the premises in two sludge holding areas located north of the road leading from the settling lagoons to the oxidation pond. The BOD₅ of the material shown ranges around 100,000mg/l. It seeps into the stream in the vicinity of the new outlet from the new biodisks and filters (001A). Unfortunately you won't be able to find this material as it has been mixed and covered up by several hundred thousand gallons of sludge pit paint sludge and water containing 1,000 or so mg/l of BOD, caustic, thinners, and other assorted contaminants.

Picture #3 shows oil which floated down oo3 outlet during a period when no flow was being reported on the M.O.R. Zinc sludge, at least 20,000 gal of unreported flow/day, oil, and other contaminants have exited this outlet much of the summer. Note the straw as a feeble attempt at cleanup. All were left as is until a storm washed the material into the swamp.

Happy hunting.
A Friend

P.S. Handle with care, as honest people's jobs are now on the line. I took then Ranger Rick pledge too.
